Redundant (duplicate) publication in a published article

- The instructions to authors should state the journal's policy on redundant publication.
- To help in future investigations, ask authors at submission stage to verify that their manuscript is original and has not been published elsewhere.
- ICMJE advises that translations are acceptable but MUST reference the original. Editors may consider publishing a correction (ie, the link to the original article) rather than a retraction/notice of duplicate publication in such cases.

READER INFORMS EDITOR ABOUT **REDUNDANT PUBLICATION** Thank reader and say you plan to investigate. Get full documentary evidence if not already provided Check extent and nature of overlap/redundancy Major overlap/redundancy (ie, based on same dataset Minor overlap ('salami publishing' with some with identical findings and/or evidence that authors element of redundancy) or legitimate repetition have sought to hide redundancy, for example, by changing or re-analysis (eg, subgroup analysis/ title or author order or not referring to previous papers) extended follow-up/repeated methods) ¥ Contact author in neutral terms expressing concern/explaining journal's position. Explain that secondary Contact corresponding author in writing, ideally papers must refer to original. Discuss enclosing signed authorship statement (or cover letter) publishing correction giving reference to original paper. stating that submitted work has not been published elsewhere and documentary evidence of duplication
